

OJT Job Description – IT Support / Technical Support Trainee

We are looking for motivated OJT applicants to assist in daily IT operations, including computer setup, maintenance, and asset management. The trainee will gain hands-on experience in technical support and IT infrastructure tasks.

Key Responsibilities:

- Perform computer setup, deployment, and system reimaging
- Conduct hardware checking and basic troubleshooting of computer units and peripherals
- Replace defective computer peripherals when necessary
- Assist in cable management and workspace organization
- Support weekly IT walkthroughs and inspections across different departments
- Maintain and update IT inventory, including RFID scanning of PCs and monitors
- Input and manage device information (e.g., hostnames) in Excel
- Assist in IT room inventory reconciliation
- Help prepare and set up workstations for training and operations
- Ensure proper documentation of completed tasks and updates
